

PHARMACEUTICAL CENTRIFUGES

Wide speed range
Exchangeable baskets
WI-FI control

CPPE d.o.o. offers a wide range of benchtop and kilo lab solid-liquid isolation units/centrifuges with vertical axis basket for chemical and pharmaceutical applications with a wide speed range **from 20-10000 RPM and exchangeable basket**. Centrifuges can also be designed and manufactured to operate in potentially explosive environments (ATEX) and/or with additional containment system for high potent API applications. Equipment can be controlled and monitored over **WI-FI operating panel**. Wetted parts are made from chemically resistant stainless steel in pharma grade quality.

custom solutions

Pharmaceutical centrifuge include (standard option):

- Small rotor basket/sieve (see table below)
(industrial volumes also available)
- Speed range **20-10000 RPM**
- Wetted parts: AISI 316L
- On-board operating panel
- Touchpad with user-friendly GUI for controlling manual
- Mobile base frame with antistatic wheels and brakes
- Sight glass
- Inlet tube with nozzle

(advanced options):

- Additional rotor baskets/sieve (see table below)
- Wetted parts: Hastelloy C22
- WI-FI operating panel
- Double jacket vessel
- Hand guided knife for scraping the filtrate
- Sight glass with wiper
- Automatic nitrogen purging system
- ATEX

Rotor diameter [mm]	Height [mm]	Volume [L]	Top speed [min ⁻¹]	Centrifugal force [x g]
90	100	0,35	10000	5032
110	100	0,45	10000	6150
140	120	0,9	6000	2818
190	120	1,28	6000	3824

- Final layout customized for every customer
