

GLASS REACTORS AND EQUIPMENT

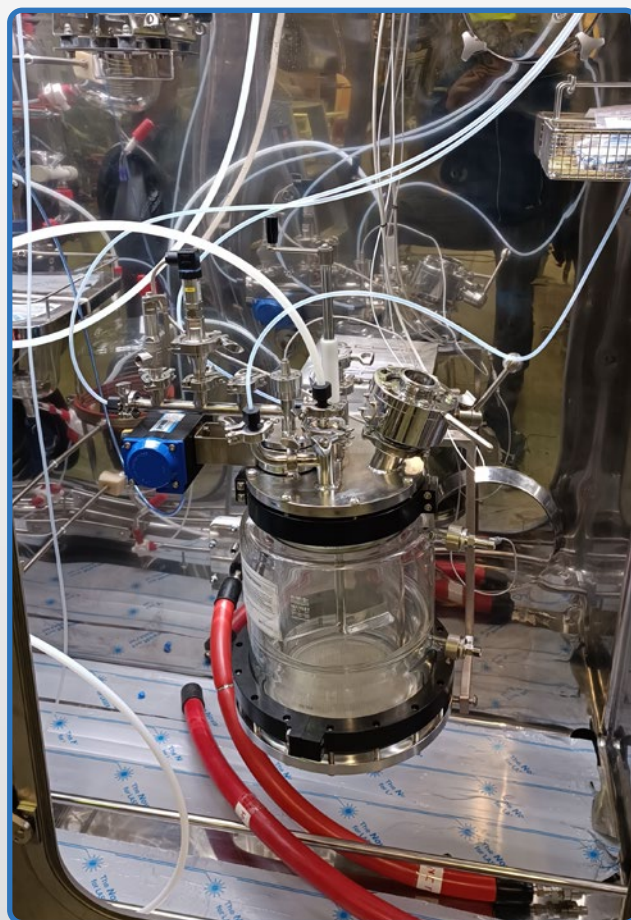

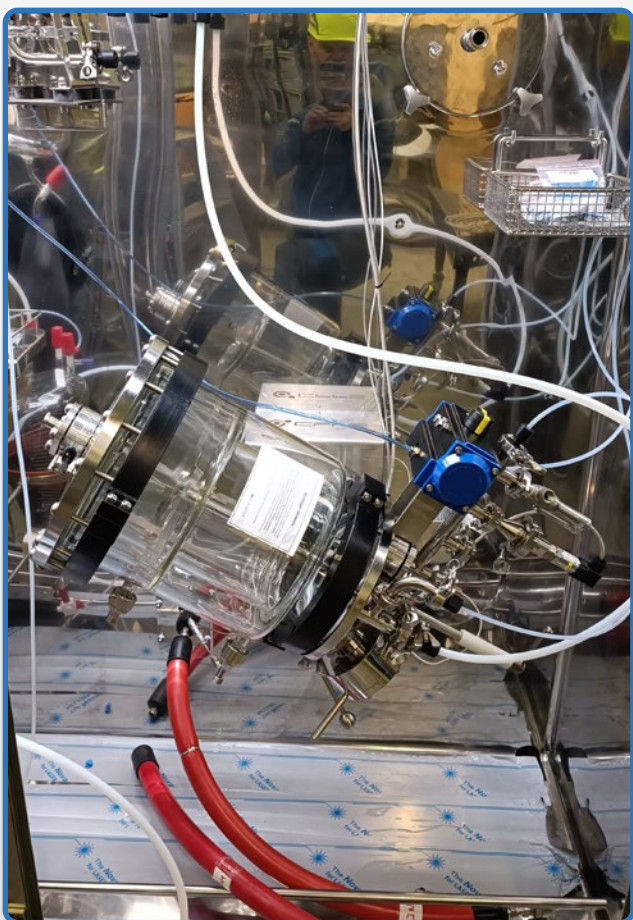

REC reactor units are made either of glass, stainless steel (optional steel enamel also available) or C22 nickel alloy. Surface is treated to pharma-quality with electropolishing. We make them as mobile or fixed units. They can be fully or partially automated with modern control and regulation systems connected to the existing central control systems. The reactors are adapted to the needs of the customer according to the required process parameters.

custom solutions

Custom designed equipment for

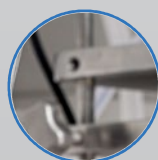

REACTION EQUIPMENT

- Double-walled reactors
- Reactor lids
- Columns and column heads
- Bottom valves
- Evaporators
- Condensers, product coolers
- Stirrers & accesories
- Universal rack systems
- Accesories for reactions vessels

AUXILIARY EQUIPMENT

- Plastic and metal fittings
- Metal support construction
- Hoses (PTFE antistatic)
- Gaskets and sealing systems
- Stiring drives
- Sinthered mesh and filter plates
- Mobile frames and trolleys
- Tilting systems

pharmaceutical and chemical industry

CONTROL AND REGULATIONS

- Custom designed HMI Fully automated systems
- Remote control systems
